

Name: UJAM PRECIOUS MMESOMA

Project: FIFA World Cup Performance Dashboard

Tool: Microsoft Power BI

Dataset: FIFA World Cup Team Performance (2002–2018)

Model Overview

The FIFA World Cup Performance Dashboard is designed to analyze team performance across five FIFA World Cup tournaments (2002, 2006, 2010, 2014, and 2018). The model enables users to evaluate team statistics such as games played, wins, draws, losses, goals scored, goals conceded, goal difference, points, and tournament rankings. A star schema was implemented using one fact table and supporting dimension tables to improve report performance, simplify analysis, and support interactive filtering and drill-through functionality.

Table Inventory

Table	Role	Source	Row count
FactFIFA	Fact table	FIFA world cup dataset	160
DimCountry	Dimension table	Derived from FactFIFA	59
DimDate	Dimension table	Calendar table	6,209

Field Dictionary

FACT FIFA

Column	Data type	Description	Transformation
Team	Text	Country participating in the tournament	Original
Tournament year	Whole number	FIFA world cup year	Original
Games played	Whole number	Total matches played	Original
Win	Whole number	Matches won	Original
Draw	Whole number	Matches drawn	Original
Loss	Whole number	Matches lost	Original
Goals for	Whole number	Goals scored	Original
Goals against	Whole number	Goals conceded	Original
Goal difference	Whole number	Goals for minus Goals against	Changed the prefix of negative numbers from en-dash symbol which Power BI treated as text, to the standard minus sign
Points	Whole number	Tournament points	Original
Position	Whole number	Final tournament ranking	Original

Dim Country

Column	Data type	Description
Team	Text	Unique list of participating countries

Dim Date

Column	Data type	Description
Date	Date	Calendar date
Day	Whole number	Day of month
Month	Text	Month name
Month number	Whole number	Month number
Quarter	Text	Quarter of year
Year	Whole number	Calendar year

Measure Dictionary

Total Games

Formula: Total Games = SUM(FactFIFA[Games Played])

Description: Calculates the total number of matches played.

Business Question: How many World Cup matches were played?

Total Wins

Formula: Total Wins = SUM(FactFIFA[Win])

Description: Calculates the total matches won.

Business Question: How many games were won?

Total Draws

Formula: Total Draws = SUM(FactFIFA[Draw])

Description: Calculates total draws.

Business question: How many games were tied?

Total Losses

Formula: Total Losses = SUM(FactFIFA[Loss])

Description: Calculates total losses.

Business Question: How many games were lost?

Total Goals Scored

Formula: Total Goals Scored = SUM(FactFIFA[Goals For])

Description: Calculates total goals scored.

Business Question: How many goals were scored?

Total Goals Conceded

Formula: Total Goals Conceded = SUM(FactFIFA[Goals Against])

Description: Calculates total goals conceded.

Business Question: How many goals were conceded?

Goal Difference

Formula: Goal Difference = [Total Goals scored] - [Total goals conceded]

Description: Calculates overall goal difference.

Business Question: Which teams have the strongest offensive and defensive performance?

Total Points

Formula: Total Points = SUM(FactFIFA[Points])

Description: Calculates tournament points.

Business Question: Which teams earned the highest number of points across all 5 FIFA world cup tournaments?

Win Rate

Formula: Win Rate = DIVIDE([Total Wins],[Total Games],0)

Description: Returns percentage of matches won.

Business Question: How efficient is a team's performance?

Draw Rate

Formula: Draw Rate = DIVIDE([Total Draws],[Total Games],0)

Description: Returns percentage of matches tied.

Business Question: How often does a team finish its games in a draw?

Loss Rate

Formula: Loss Rate = DIVIDE([Total Losses],[Total Games],0)

Description: Returns percentage of matches lost.

Business Question: Which teams have the highest or lowest percentage of games lost?

Average Goals Per Game

Formula: Average Goals Per Game = DIVIDE([Total Goals Scored],[Total Games],0)

Description: Calculates average goals scored per game.

Business Question: On average, how many goals does a team score per game?

Average Points

Formula: Average Points = AVERAGE(FactFIFA[Points])

Description: Calculates average tournament points.

Business Question: What is the average number of points earned by a team per tournament?

Relationship Map

The model follows a Star Schema.

From	To	Cardinality	Filter Direction
DimCountry[Team]	FactFIFA[Team]	One-to-Many	Single
DimDate[Year]	FactFIFA[Tournament Year]	One-to-Many	Single

The model uses single-direction relationships to improve performance and avoid ambiguity.

Source-to-Model Reconciliation

Validation	Source	Model
Total Records	160	160
Countries	59	59
Tournament Years	5	5

No discrepancies were identified between the source dataset and the Power BI model after data cleaning and transformation.

Refresh & Maintenance Notes

Refresh Frequency

Manual refresh.

Data Source

Excel Workbook containing FIFA World Cup Team Statistics.

Gateway

Not required (Local File).

Known Limitations

- Dataset includes only FIFA World Cup tournaments from 2002–2018.
- Statistics are aggregated at the tournament level rather than individual matches.
- Dashboard is intended for historical analysis and does not update automatically with future tournaments.
